

Inclusive Practices Training Series

One of the many goals for a preschool program is to nurture the experience for young children to develop a strong social-emotional foundation for future school engagement and quality of life. The purpose of the Beginning Together training series is to ensure that children with special needs also get the opportunity to experience these foundations to support their future school engagement and quality of life as well.

Please join us for our free Inclusive Practices Training Series! This three event series will be delivered in a unique format that will offer the flexibility of viewing a two-hour video over a one-week period, with a one-hour mandatory follow up Zoom conversation at the end. These trainings will cover areas of the law and rights for children with disabilities, when concerns arise for teachers, and the Building Blocks set of practices to support the engagement of child with disabilities and other special needs.

Inclusive Practices – Training #1 (Setting the Stage for Inclusion)

- View 2-hour pre-recorded training November 16 - November 19
