OVERVIEW
The California Early Care and Education (ECE) Workforce Registry (the Registry) is a web-based data system that maintains demographic and verified education and professional development information for members of the early care and education workforce in an electronic portfolio.

The Registry takes the protection of members’ personal information seriously. However, some information about Registry members can be shared with employers who have been authorized to receive Administrative Access. Sharing information with employers supports professional development planning and reduces the need for multiple submissions of child development permits, transcripts, training records, credentials and other documentation. Administrators, or designated staff in organizations that employ members of the workforce (ex. Human Resources), who have been granted Administrative Access can also verify key information about their employees and obtain reports with verified data, including Quality Counts California staff qualifications scores. The Registry is currently available statewide through support from a collaboration of funders, see below.

Administrative Access helps to ensure that the Registry has current and accurate information about ECE programs and their staff. It also helps to streamline reporting to state agencies and other funders. In order to receive Administrative Access, approved individuals must agree to do the following:

- Be an active-member of the Registry
- Maintain an active e-mail account that is linked to your Registry profile
- Maintain an accurate and complete Program Profile by confirming or updating information annually
- Maintain accurate information about employees by confirming or updating information monthly
- Protect the security and integrity of personal information about employees in the Registry

Applying for Administrative Access is a two-step process:

Step 1:
Apply by logging into the CA ECE Workforce Registry (www.caregistry.org), clicking Administrative Access Request. After reviewing the process and agreement, click the Request Administrative Access button. Be sure to include all of the facilities for which Administrative Access is being requested. For example, for multi-site administrators, Administrative Access should be requested for all applicable sites. If a facility cannot be located using the search function, the facility information should be detailed in the documentation that is submitted to the Registry Office (see guidelines below).

You will receive email confirmation of your Administrative Access Request which will include instructions on where to send documentation.
**Step 2:**
Submit the required documentation using one of the following methods: (1) upload to the Registry profile of the member requesting Administrative Access, (2) attach to an email and send to email address below or (3) send by postal mail to mailing address below. Required documentation varies based on the type of facility and/or organization the person requesting Administrative Access works for:

<table>
<thead>
<tr>
<th>Type of Business</th>
